Professional Directory
Society of American Bacteriologists

T HE Council of the Society has authorized the establishment of a directory where those who desire to fill vacancies may secure a selected list of applicants. This list is composed of teachers of bacteriology, technicians in laboratories, applicants for fellowships and scholarships in bacteriology serology, immunology, and research workers in medical or agricultural bacteriology. Employers may receive information regarding applicants without charge. Information regarding vacancies should be filed upon a blank which has been prepared to secure uniform information regarding a particular vacancy.

Apply for application blanks at the following address: F. M. MEADER, M.D., Detroit Department of Health, Detroit, Mich.

Employment Agency
Society of American Bacteriologists

T HE Council of the Society has authorized the establishment of an employment agency. Bacteriologists and technicians may learn of positions by making application to the address below. Applicants for positions if not members of the Society will agree to send to the agency 5% of their salary for the first three months. If the applicant is a member of the Society he will agree to send only 3% of his salary for the first three months.

All funds accruing to the Society in excess of necessary and actual expenses, after being audited by the Society will be transferred to the treasurer of the Society for the improvement and enlargement of its Journal, support of its research fellowship, collection of cultures of bacteria, etc.

Send for application blanks to F. M. MEADER, M.D., Detroit Department of Health, Detroit, Mich.

Entered as second-class matter April 17, 1916 at the postoffice at Baltimore, Maryland, under the Act of March 3, 1879.
