The Polyphasic Potencies of the Bacterial Cell; Its General Biologic and Chemotherapeutic Significance. Ralph R. Mellon. 1

Relation of Maximum Growth Temperature to Resistance to Heat. Carl Lamanma. 29

The Significance of the Large Bodies and the Development of L Type of Colonies in Bacterial Cultures. L. Diens. 37

Action of Intestinal Microorganisms on Ascorbic Acid. Raymond M. Young and L. H. James. 75

Bactericidal Action of Ultraviolet Radiation on Air-Borne Organisms. Harvey C. Rentschler and Rudolph Nagy. 85

Studies Pertaining to the Antibacterial Activity of Sulfathiazole and its Methyl Derivative. R. D. Muir, V. J. Shamleffer and L. R. Jones. 95

The Disinfection of Trout Eggs Contaminated with Bacterium Salmonicida. Lynn L. Gee and W. B. Sarles. 111

The Effect of Inorganic Salts on the Production of Small Colony Variants by Staphylococcus Aureus. Guy P. Youmans and Edna Delves. 127

Notes. 137

Proceedings of Local Branches of the Society of American Bacteriologists. 139
CONTENTS

No. 1, JULY, 1942

The Polyphasic Potencies of the Bacterial Cell; Its General Biologic and Chemotherapeutic Significance. Ralph R. Mellon ......................................................... 1
Relation of Maximum Growth Temperature to Resistance to Heat. Carl Lamanna ......................................................... 29
The Significance of the Large Bodies and the Development of L Type of Colonies in Bacterial Cultures. L. Diens ................................................................. 37
Action of Intestinal Microorganisms on Ascorbic Acid. Raymond M. Young and L. H. James ................................................................. 75
Bactericidal Action of Ultraviolet Radiation on Air-Borne Organisms. Harvey C. Rentzler and Rudolph Nagy ................................................................. 85
Studies Pertaining to the Antibacterial Activity of Sulfathiazole and its Methyl Derivative. R. D. Muir, V. J. Shamleffer and L. R. Jones ................................................................. 95
The Disinfection of Trout Eggs Contaminated with Bacterium salmonicida. Lynn L. Gee and W. B. Sarles ................................................................. 111
The Effect of Inorganic Salts on the Production of Small Colony Variants by Staphylococcus aureus. Guy P. Youmans and Edna Delves ................................................................. 127
A Medium for the Rapid Cultivation of Soil Actinomycetes. Elizabeth J. Bottcher and H. J. Conn ................................................................. 137
Simplified Method for the Preparation of Silica Gels. A. J. Sterges ................................................................. 138

No. 2, AUGUST, 1942

Growth of Small Numbers of Tubercle Bacilli, H37, in Long's Liquid Synthetic Medium and Some Interfering Factors. W. F. Drea ................................................................. 149
The Utilization of Amino Acids and Related Compounds by Clostridium tetani. C. E. Clifton ................................................................. 179
Growth Factor Requirements of Bacillus larvae, White. A. G. Lochhead ................................................................. 185
The Sanitary Significance of Pectin-Fermenting, Lactose-Fermenting, Gram-Negative, Non-Spore-Forming Bacteria in Water. D. B. McFadden, R. H. Weaver and M. Scherago ................................................................. 191
The Effect of Staphylococcus Enterotoxin on Isolated Rabbit Gut Segments. Julius J. Richmond and C. I. Reed ................................................................. 201
Technique for the Determination of the Sensitivity of a Strain of Streptococcus to Bacteriophage of Type A, B, C or D. Alice C. Evans ................................................................. 207
Another Serologic Type of Streptococcic Bacteriophage. Alice C. Evans and Elsie M. Sockrider ................................................................. 211
Respiratory Studies of the Micrococci. T. D. Nunheimer and F. W. Fabian ................................................................. 215
A Bacteriological Comparison between Synthetic and Natural Glycerol. H. J. Peppler ................................................................. 233
A Microscopic Alkali-Solubility Test for the Identification of Gonococcus Colonies. A. Cantor, H. A. Shlenski and C. Y. Willard ................................................................. 237
The Technique of Quantitative Chorioallantoic Virus Titration. F. M. Burnet and Dorothy D. Faris ................................................................. 241
Alpha-Naphthol Color Test for Dihydroxyacetone and Hydroxymaleic Acid. William J. Turner, Bernard H. Kress and Norman B. Harrison ................................................................. 249
Hydrogen in the Metabolism of Azotobacter. J. B. Wilson and P. W. Wilson ................................................................. 250
Proceedings of Local Branches of the Society of American Bacteriologists, North Central, Ohio, Central New York and Maryland Branches ................................................................. 253
CONTENTS

No. 3, SEPTEMBER, 1942

The Isolation and Absorption Spectrum Maxima of Bacterial Carotenoid Pigments. Ben Sobin and Grant L. Stahly................................. 265
Quantitative Determination of the Bacteriostatic Effect of the Sulfonamide Drugs on Pneumococci. Colin M. MacLeod and George S. Mirick.................. 277
A Description of an Unusual Salmonella Type with Special Reference to the Evolution of Salmonella Species. P. R. Edwards and D. W. Bruner............. 289
A Study of Thiobacillus thiooxidans with the Electron Microscope. W. W. Umbreit and T. F. Anderson..................................................... 317
Oxygen Demand and Oxygen Supply. Otto Rahn and G. L. Richardson..... 321
The Production of Active Resting Cells of Streptococci. A. J. Wood and I. C. Gunsalus 333
Nutritive Requirements of Osmophilic Yeasts. A. G. Lochhead and G. B. Landerkin...... 343
Validity of the Genus Acaligenes. H. J. Conn.......................................................... 353
Bacterial Morphology as Shown by the Electron Microscope. III. Cell-Wall and Protoplasin in a Strain of Fusobacterium. Stuart Mudd, Katherine Polevitzky, Thomas F. Anderson and Clara C. Kast........ 361
Relative Inhibition of Microorganisms by Glucose and Sucrose Sirups. L. Tharkow, C. R. Fellers and A. S. Levine................................. 367
Selective Antibiotic Action of Various Substances of Microbial Origin. Selman A. Waksman and H. Boyd Woodruff........................................... 373
The Effect of Benzoic Acid and Related Compounds on the Growth of Certain Mycobacteria. Arthur K. Saz and Federick Bernheim............. 385
Proceedings of Local Branches of the Society of American Bacteriologists, Kentucky, Missouri Valley, New Jersey and New York Branches.................................................. 387

No. 4, OCTOBER, 1942

The Microbial Flora of the Rocky Mountain Wood Tick, Dermacentor andersoni Stiles. Edward A. Steinhaus................................................................. 389
A Note on Elasticotaxis in Myxobacteria. R. Y. Stanier................................. 405
Culture on the Chick Chorio-allantois as a Test of Inactivation of Vaccinia Virus. Wolcott B. Dunham and Ward J. MacNeal........................................... 413
Nitrate, Nitrite and Indole Reactions of Gas Gangrene Anaerobes. R. W. Reed.... 425
The Erwinia-Coliform Relationship. R. P. Elrod............................................... 433
Yeasts Occurring in Sourcing Figs. E. M. Mrak, H. J. Phaff, R. H. Vaughn and H. H. Hansen................................................................. 441
Studies on the Luminous Bacteria. I. Nutritional Requirements of Some Species, with Special Reference to Methionine. Michael Doudoroff........................................ 451
Studies on the Luminous Bacteria. II. Some Observations on the Anaerobic Metabolism of Facultatively Anaerobic Species. Michael Doudoroff........... 461
Cultural Characteristics of Penicillinatum notatum in Relation to the Production of Antibacterial Substance. Walter Kocholaty.............................. 469
Pyridoxine Nutrition of Lactic Acid Bacteria. Nestor Bohonos, B. L. Hutchings and W. H. Peterson................................................................. 479
Differentiation of the "Intermediate" Coll-like Bacteria. Reese H. Vaughn and Max Levine................................................................. 487
Rapid Demonstration of Hemolysis Due to Anaerobes. Harriette D. Vera.............. 507

No. 5, NOVEMBER, 1942

Chromobacterium violaceum, var. manilae, as a Pathogenic Microorganism. Herbert J. Schattenberg and William H. Harris................................. 509
The Dehydrogenation of Alcohols by Streptococci of Group B. I. C. Gunsalus and A. J. Wood................................................................. 523
Cell Inclusions of Globiforme and Related Types of Soil Microorganisms. Francis E. Clark and Roland B. Mitchell.................................. 529
The Effect of Various Substances on the Oxygen Uptake of Blastomyces dermatitidis. Frederick Bernheim........................................... 533
Bacteriological Studies on the "Natural" Fermentation Process of Preparing Egg White for Drying. L. S. Stuart and Harry E. Goresline........ 541
A Test for Sexual Fusion in Bacteria. John W. Gowen and Ralph E. Lincoln........ 551
Agar-Decomposing Strains of the Actinomyces coelicolor Species-Group. R. Y. Stanier. 555
Bacteriostatic and Bacteriolytic Properties of Actinomycetes. Maurice Welsch...... 571
Classification of 110 Strains of Staphylococcus aureus. Olive Durfee.................. 589
Ultracentrifugation and Cytology of Spirillum volutans. R. L. King and H. W. Beams. 597
The Status of Bacillus subtilis, Including a Note on the Separation of Precipitinogens from Bacterial Spores. Carl Lamanna............................... 611
Anaerobic Plates. Max S. Marshall and Helen P. Nordby.................................. 619
Serological Relationships between Diplococcus pneumoniae and Hemophilus influenzae. Orren D. Chapman and Winifred Osborne............... 620
Proceedings of Local Branches of the Society of American Bacteriologists, Eastern Missouri Branch......................................................... 623

CONTENTS

No. 6, December, 1942

Studies of Bacteria from Fermenting Egg White and the Production of Pure Culture Fermentations. L. S. Stuart and Harry E. Goresline........................................ 625
Pseudomonas aeruginosa: Its Role as a Plant Pathogen. R. P. Elrod and Armin C. Braun................................................................. 633
A Study of Two Atypical Strains of E. typhosa. Dorothy N. Sage and E. H. Spaulding. 647
Spore Formation by Bacillus subtilis in Peptone Solutions Altered by Treatment with Activated Charcoal. James L. Roberts and I. L. Baldwin........................................ 653
The Toxic Effect of Splenic Extracts on Streptococcus hemolyticus. Leo G. Nutini and Cornelius W. Kreke................................................. 661
Factors Affecting the Beading of the Tubercle Bacillus stained by the Ziehl-Neelsen Technique. Diran Yegian and Louis Baisden........... 667
Further Studies on Proteus hydrophilitis, the Etiological Agent in "Red Leg" Disease of Frogs. W. L. Kulp and D. G. Borden.............. 673
Luminous Bacterial Auxanograms in Relation to Heavy Metals and Narcotics, Self-Photographed in Color. Frank H. Johnson, Clifford M. Carver and W. K. Har- man.................................................. 703
Methionine Made an Essential Growth Factor by Cultivation of E. coli in the Presence of Methionine and Sulfanilamide. Henry I. Kohn and Jerome S. Harris........ 717
A Practical Suggestion for the Serological Type Determination of Salmonella Organ- isms. S. Bornstein................................................................. 719
Proceedings of Local Branches of the Society of American Bacteriologists, Central New York Branch....................................................... 721
Index ............................................................................................. 725
