The Application of Walker's Index of Functional Normality to a Study of Developing Chick Embryos Infected with the Levaditi Strain of Vaccinia. RACHEL E. HOFFSTADT AND HELEN B. TRIPIT 617

Two New Amino-Acid-Fermenting Bacteria, Clostridium propionicum and Diplodoccus glycinephilus. B. P. CARDON AND H. A. BARKER 629

A Bactericidal Detergent for Eating Utensils. ALBERT F. GUITERAS AND REBECCA L. SHAPIRO 635

The Amount of Enzyme Inactivation at Bacteriostatic and Bactericidal Concentrations of Disinfectants. MARTHA HOLY ROBERTS AND OTTO RAHN 639

Studies on Highly Soluble Azo Sulfonamides. C. A. LAWRENCE, H. KLEINIGL, AND G. R. GÖETTLER 645

The Viability of Dried Skim-Milk Cultures of Lactobacillus bulgaricus as Affected by the Temperature of Reconstitution. MARVIN L. SPECK AND ROBERT F. MYERS 657

Fatty Material in Bacteria and Fungi Revealed by Staining Dried, Fixed Slide Preparations. KENNETH L. BURDON 665

Disparity in Appearance of True Hansen’s Bacilli and Cultured “Leprosy Bacilli” When Stained for Fat. KENNETH L. BURDON 679

Comparative Action of an Extract of Brain Tissue and Penicillin on Staphylococcus aureus Infections. LEO G. NUTINI AND SISTER EVA MARIA LYNCH 681

The So-called Pseudomonas vendrelli. WALTER C. TOBIE 685

Factors Influencing the Morphology of Blastomyces dermatitidis. SEYMOUR LEVINE AND Z. JOHN ORDAI 687

Stages in the Life History of Phytomonas tumefaciens. ARMIN C. BRAUN AND R. P. ELMOD 695

The Acclimatization of Yeast to High Concentrations of Glucose: The Subsequent Effect upon Alcohol Tolerance. WILLIAM D. GRAY 703

Proceedings of Local Branches of the Society of American Bacteriologists 711

Index of Authors 713

Index of Subjects 716

Contents
CONTENTS

NO. 1, JULY, 1946

Botulinum Toxin (Type A); Including a Study of Shaking with Chloroform as a Step in the Isolation Procedure. Carl Lamanna, Henning W. Eklund, and Olive E. McElroy.............................. 1

The Taxonomic Position of Corynebacterium acnes. H. C. Douglas and Shirley E. Gunter................................................................. 15

The Separation of Different Strains of Bacteriophage from a Crude Culture. J. Kleczkowska................................................................. 25

In Vitro Studies Concerning the Action of Penicillin on the Viridans Streptococci, Including Observations on the So-called Synergistic Effect of Sulfonamide Drugs. Benedict F. Massell, Mary Meyserian, and T. Duckett Jones................ 33

Strain Variation as a Factor in the Sporulating Properties of the So-called Bacillus globigii. A. E. Hayward, J. A. Marchetta, and R. S. Hutton.................................................. 51

The Effect of Streptomycin on Proteus Infections of the Chick Embryo. Z. John Oral and Esther Meyer.............................................................. 67

Studies on the Death of Bacteria at Low Temperatures. II. The Comparative Effects of Crystallization, Vitromelting, and Devitrification on the Mortality of Escherichia coli. Russell S. Weiser and Clarice Osterud Hargiss.............. 71

The Relative Activity of Penicillins F, G, K, and X Against Spirochetes and Streptococci in Vitro. Harry Eagle........................................... 81

The Activity of Penicillin in Relation to Bacterial Spores and the Preservation of Milk. Harold R. Curran and Fred R. Evans.............................. 89

The Nature of the Acid-fast Stain. Carl Lamanna.......................................................................................................................... 99

The Influence of "Folic Acid" Deficiency in Macaca mulatta on Susceptibility to Experimental Poliomyelitis. Herman C. Lichstein, K. B. McCall, C. A. Elvehjem, and P. F. Clark................................................................. 105

Cetyl Pyridinium Chloride. I. Germicidal Properties. R. Quisno and Milton J. Poter......................................................................................... 111

The Effect of Environmental Conditions on Penicillin Fermentations with Penicillium chrysogenum X-1612. J. J. Stefaniak, F. B. Gailey, F. G. Jarvis, and M. J. Johnson................................................................. 119

A Comparison of Penicillin-producing Strains of Penicillium notatum-chrysogenum. F. B. Gailey, J. J. Stefaniak, B. H. Olson, and M. J. Johnson................................................................. 129

Notes:
The Preparation of Loeffler’s Serum and Similar Coagulable Mediums. Robb Spalding Spray and Elmer Jay Johnson........................................... 141

The Activity of Streptomycin in Relation to Bacterial Spores and the Preservation of Milk. Harold R. Curran and Fred R. Evans.............................. 142

Hydrogen Sulfide Formation by Shigella alkaescens. Mildred M. Galton and Mary E. Hess........................................................................ 143

Trimethylamine Oxide Reduction and the Eijkman Reaction in the Genus Brumia. R. P. Elrod........................................................................ 144

The Antibiotic Activity of Violacein, Prodigiosin, and Phthiocin. Herman C. Lichstein and Virginia F. Van de Sand........................................ 145

The Occurrence of Salmonella blegdam in the Philippines. Russell B. Stevens........................................................................ 146

A Note on Salmonella abortus-equi Infection in Man. D. W. Bruner........................................................................ 147

Proceedings of Local Branches of the Society of American Bacteriologists................................................................. 149
No. 2, August, 1946

Antimalarial and Antibacterial Substances Separated from Higher Plants. H. J. Carlson, H. D. Bissell, and M. G. Mueller ........................................ 155
The Potentiation of Tetanus Toxin by Broth and Serum. F. B. Traub, A. Hollander, and U. Friedemann .................................................. 169
The Nutrition of Phytopathogenic Bacteria. II. The Genus Agrobacterium. Mortimer P. Starr .......................................................... 187
The Amino Acid Composition of Microorganisms. J. L. Stokes and Marion Gunness ................................................................. 195
Studies on Lyophilized Cultures. Lyophilized Storage of Cultures of Rhizobium leguminosarum. M. D. Appleman and O. H. Sears ............. 209
Organic Growth Essentials of the Aerobic Nonsulfur Photosynthetic Bacteria. S. H. Hutner ................................................................. 213
Studies on the Nutritional Requirements of Streptomyces griseus for the Formation of Streptomycin. Geoffrey Rake and Richard Donovick ...... 223
Proteinase Production by Bacillus subtilis. J. Richard Stockton and Orville Wyss ................................................................. 227
A New Laboratory Fermenter for Yeast Production Investigations. Irvin C. Feustel and Harry Humfeld ........................................... 229
The Isolation of Escherichia coli Phage by Means of Cationic Detergents. Seymour S. Kalter, V. Dayman Mordaunt, and Orren D. Chapman .................. 237
The Effect of Serum upon Dissociation in Brucella abortus. A Demonstration of the Role of Selective Environments in Bacterial Variation. Werner Braun .......... 243
The Reductase Method for the Determination of Penicillin Concentrations in Body Fluids. Roger D. Reid and John H. Brewer ........................................ 251
Note:
The Use of the Rodent-adapted MEF1 Strain of Human Poliomyelitis in Neutralisation Tests with Serum of Apparently Normal African Natives. Peter K. Oltisky and C. M. Findlay ......................... 255
Proceedings of Local Branches of the Society of American Bacteriologists .................................................. 257

No. 3, September, 1946

Brucella suis in Aerated Broth Culture. I. Preliminary Studies on Growth Assays, Inoculum, and Growth Characteristics in an Improved Medium. Philipp Gerhardt and Lynn L. Gee ........................................... 261
Brucella suis in Aerated Broth Culture. II. Aeration Studies. Lynn L. Gee and Philipp Gerhardt .................................................. 271
Brucella suis in Aerated Broth Culture. III. Continuous Culture Studies. Philipp Gerhardt ................................................................. 283
A Critical Evaluation of the Nitrogen Assimilation Tests Commonly Used in the Classification of Yeasts. Lynferd J. Wickerham ......................... 293
A New Medium for the Detection of Urea-splitting Organisms. Morris D. Schneider and Millard F. Gunderson ........................................... 303
“False Positive” Hemagglutination by Allantoic Fluids of Embryonated Eggs Incubated with Unfiltered Throat Washings. Alfred L. Florman .......... 307
Decomposition of Tartrates by the Coliform Bacteria. Reece H. Vaughn, George L. Marsh, Thresa C. Stadman, and Betty C. Cantino .............. 311
Methods of Study of Antiphage Agents Produced by Microorganisms. Doris Jones and Albert Schatz ................................................................. 327
Temperature Relations in Phagocytosis. Doralea R. Harmon, Christine Zarafonitis, and Paul F. Clark .......................................................... 337

Salmonella senegal, a New Type Isolated from a Green Mamba Snake. W. R. Hinshaw and Ethel McNeil .......................................................... 349

The Effect of Aeration on Amylase Production by Bacillus macerans. Hilda S. Daniels and Grant L. Stahly .................................................. 351

Acetic Acid Inhibition of Gram-negative Bacilli in Culture Media. Cora Ruet Owen .......................................................... 353

Studies on the Production of Antibiotics by Actinomycetes and Molds. R. L. Emerson, Alma J. Whiffen, Nestor Bohonos, and C. DeBoer ............................................ 357

The Use of Soluble Starch Medium in the Preparation of Smooth "O" Salmonella Antigens. Vera M. Crossley, Mary Ferguson, and Lorne Brydson ........................................ 367

A Method for the Aseptic Handling of Highly Viscous Materials. Sidney J. Baum .......................................................... 373

Bacterial Lysis by Lysozyme. Rose R. Feiner, Karl Meyer, and Anita Steinberg .......................................................... 375

The Fragmentation of the Mycelium of Penicillium notatum and Penicillium chrysogenum by a High-Speed Blender and the Evaluation of Blended Seed. G. M. Savage and M. J. Vander Brook ........................................ 385

Isolation of Streptomycin-producing Strains of Streptomyces griseus. Selman A. Waksman, H. Christine Reilly, and Donald B. Johnstone ........................................ 393

Proceedings of Local Branches of the Society of American Bacteriologists .......................................................... 399

No. 4, October, 1946

The Serological Relationship Between Erwinia tracheiphila and Species of Shigella. R. P. Elrod .......................................................... 405

Small Colony Variants of Escherichia coli. Charlotte A. Colwell .......................................................... 417

The Growth of Brucella in Aerated Liquid Cultures. H. N. Glassman and S. Elberg .......................................................... 423

Further Studies on One Anaerogenic Parasolon Organism, Type 29011. C. A. Stuart, K. M. Wheeler, and Virginia McGann .......................................................... 431

The Adhesion of Rabbit Platelets to Bacteria. Ralph B. Houlihan and Alfred L. Copley .......................................................... 439

On the Isolation from Agar of an Inhibitor for Neisseria gonorrhoeae. Herbert L. Levy, Jr., and J. Howard Mueller .......................................................... 453

Urea Decomposition as a Means of Differentiating Proteus and Parasolon Cultures from Each Other and from Salmonella and Shigella Types. W. Blake Christensen .......................................................... 461

The Influence of Thiamine on the Susceptibility of Chicks to Avian Encephalomyelitis. J. M. Cooperman, H. C. Lichstein, P. F. Clark, and C. A. Elvehjem .......................................................... 467

The Role of Spontaneous Variants in the Acquisition of Streptomycin Resistance by the Shigellae. Morton Klein and Leonard J. Kimmelman .......................................................... 471

Studies on the Relationship Between Bacteriophage and Bacterial Host Cell. I. Adsorption of Phage by Resistant Variants of Staphylococcus. Jane E. Henry and R. J. Henry .......................................................... 481

On the Inclusions of Hansenula anomala. Georges Knaysi .......................................................... 487

Filters Suitable for Separating Soil Bacteria from Bacteriophage. H. J. Conn and Isabelle Duminick .......................................................... 489

Notes on Monophasic Salmonella Cultures and Their Use in the Production of Diagnostic Serums. P. R. Edwards and D. W. Bruner .......................................................... 493

Proceedings of Local Branches of the Society of American Bacteriologists .......................................................... 501
CONTENTS

No. 5, November, 1946

Ammonia as an Intermediate in Nitrogen Fixation by Azotobacter. R. H. Burris and P. W. Wilson .......................................................... 505
Concentration of Brucella suis from Broth Culture. A. M. Kaplan and S. Elberg .................... 513
Motility and Swarming of Some Enterobacteriaceae. C. A. Stuart, K. M. Wheeler, Virginia McGann, and Isabel Howard ................................... 519
Studies on the Relationship Between Bacteriophage and Bacterial Host Cell. II.
Differences in Carbohydrate Metabolism of Phage-susceptible and Phage-resistant
Variants of Staphylococcus. Jane E. Henry and R. J. Henry ........................................ 527
A Study on the Mechanism of Action of Penicillin as Shown by Its Effect on Bacterial
Motility. A. Murray Fisher ................................................. 539
Citric Acid Fermentation of Beet Molasses. Philipp Gerhardt, W. W. Dorrell, and I. L. Baldwin ........ 555
Factors Affecting the Viability of Serratia marcescens During Dehydration and Storage. H. B. Naylor and P. A. Smith .................................. 565
The Inhibition of Bacteria by Thiopyrimidines. Frede Strandakov and Orville Wyss .... 575
The Oxidation of Pentoses by Pseudomonas. Lewis B. Lockwood and George E. N. Nelson .......... 581
Characteristics of Lactic Acid Bacteria from Commercial Cucumber Fermentations.
John L. Echells and Ivan D. Jones ........................................ 593
Partial Antibiotic Spectrum of Tomatin, an Antibiotic Agent from the Tomato Plant.
George W. Irving, Jr., Thomas D. Fontaine, and S. P. Doolittle .................................. 601
Notes:
A Rapid Method of Phase Isolation in Salmonella Cultures. Arnold P. Juenker .................. 609
The Production of an Antifungal Antibiotic by Streptomyces griseus. Alma J. Whiffen, Nestor Bohonos, and R. L. Emerson ........................... 610
A Modification of Henrici's Vegetable-Juice Sporulation Medium for Yeasts. Lynferd J. Wickerham, May H. Fickinger, and Kermit A. Burton ........ 611
Antisepsia and Ionization of Sodium Fluoride. Martha H. Roberts and Otto Rahn ........ 612
An Antifungal Substance from a Strain of Aspergillus flavus. S. B. Salvin ................................ 614
Pathogenicity of Candida Species for the Chick Embryo. Esther Meyer and Z. John Ordal .... 615

No. 6, December, 1946

The Application of Walker's Index of Functional Normality to a Study of Developing
Chick Embryos Infected with the Levaditi Strain of Vaccinia. Rachel E. Hoffstaddt and Helen B. Tripli .................. 617
Two New Amino-Acid-Fermenting Bacteria, Clostridium propionicum and Diplococcus
glycinophilus. B. P. Cardon and H. A. Barker ........................................... 620
A Bactericidal Detergent for Eating Utensils. Albert F. Guiteras and Rebecca L. Shapiro ........... 635
The Amount of Enzyme Inactivation at Bacteriostatic and Bactericidal Concentrations
of Disinfectants. Martha Holt Roberts and Otto Rahn ........................................ 639
Studies on Highly Soluble Azo Sulfonamides. C. A. Lawrence, H. Klingel, and G. R.
Goetchius ................................................................. 645
The Viability of Dried Skim-Milk Cultures of Lactobacillus bulgaricus as Affected by the
Temperature of Reconstitution. Marvin L. Speck and Robert P. Myers ........................... 657
Fatty Material in Bacteria and Fungi Revealed by Staining Dried, Fixed Slide Prepara-
tions. Kenneth L. Burdon ............................................ 665
Disparity in Appearance of True Hansen's Bacilli and Cultured "Leprosy Bacilli"
When Stained for Fat. Kenneth L. Burdon .......................... 679
Comparative Action of an Extract of Brain Tissue and Penicillin on *Staphylococcus aureus* Infections. Leo G. Nutini and Sister Eva Maria Lynch................. 681
The So-called *Pseudomonas wendrelli*. Walter C. Tobie............................... 685
Factors Influencing the Morphology of *Blastomyces dermatitidis*. Seymour Levine and Z. John Ordal.......................................................... 687
Stages in the Life History of *Phytoponas tumefaciens*. Armin C. Braun and R. P. Elrod................................................................. 695
The Acclimatization of Yeast to High Concentrations of Glucose: The Subsequent Effect upon Alcohol Tolerance. William D. Gray......................... 703
Proceedings of Local Branches of the Society of American Bacteriologists......... 711
Index of Authors.............................................................................. 713
Index of Subjects............................................................................ 716
Contents......................................................................................... iii
