

FEMS

MICROBIOLOGY LETTERS

An international journal providing rapid publication of short reports on microbiological research

Published by **ELSEVIER/NORTH-HOLLAND** BIOMEDICAL PRESS on behalf of the Federation of European Microbiological Societies

Editor-in-Chief

D.W. TEMPEST, Amsterdam, The Netherlands

Editorial Board

J.P. Arbutnott, Dublin, Ireland

N.J. Dimmock, Coventry, U.K.

G. Gottschalk, Göttingen, W. Germany

W. Harder, Haren, The Netherlands

T. Holme, Stockholm, Sweden

P.H. Mäkelä, Helsinki, Finland

M.R.J. Salton, New York, U.S.A.

M. Schwartz, Paris, France

J.E. Smith, Glasgow, Scotland

H. Veldkamp, Haren, The Netherlands

R. Whittenbury, Coventry, U.K.

Research papers presented in Volume 4 No. 3

Degradation of proteins in vivo and in vitro in exocellular proteinase deficient mutants of *Bacillus megaterium*, L. Váchová-Philipová and J. Chaloupka. Degradation in a mutant of *Escherichia coli* of "stable" *trp* messenger RNA synthesized from the *P_L* promoter of lambda *trp* phage, H. Iguma, T. Yamamoto, F. Imamoto and Y. Ohnishi. Growth of the methane utilising bacterium *Methylococcus*. NCIB 11083 in mineral salts medium with methanol as the sole source of carbon, J.D. Linton and J. Vokes. Wall compositions and phage-binding properties of *Bacillus subtilis* W23 grown in chemostat culture in media containing varied concentrations of phosphate, A.J. Anderson, R.S. Green and A.R. Archibald. Characteristics of *Bacillus cereus* emetic toxin, J. Melling and B.J. Capel. Radiation-induced filamentation in obligate methylotrophs, E. Williams and M.A. Shimmin. Dissolution of pyrite (FeS₂) by pure and mixed cultures of some acidophilic bacteria, P.R. Norris and D.P. Kelly. Inhibition of *Bacillus subtilis* sporulation by ochratoxin A, A. Wegner and R. Rösenthaller. Peptide hydrolases of *Brevibacterium linens*, H. Torgersen and T. Sørhaug. Parasexual genetics in the cellular slime mould *Dictyostelium discoideum*: haploidisation of diploid strains using ben late, K.L. Williams and P. Barrand. Catabolism of 3,5-dihydroxybenzoate by *Bacillus brevis*, R.L. Crawford and P.E. Perkins (Olson). Flagella development during swarmer differentiation in *Proteus mirabilis*, J.P. Armitage and D.G. Smith. N4 virion RNA polymerase: a zinc metalloenzyme, C. Casoli, M. Manini and A. Pesce. Specific inactivation of NADP-dependent glutamate dehydrogenase from *Saccharomyces cerevisiae*, J. Satrustegui and A. Machado. Neuraminidase production of *Propionibacterium acnes* and related bacteria, U. Höffler, H.-Ch. Köhler, R. Adam and G. Mauff.

1979 - Vols. 5 & 6 (2 volumes in 12 issues)

Subscription price: US \$ 128.90/Dfl. 290.00 including postage

ISSN 0378-1097

Culturing cells?

Would you like a cell culture technique
which gives you higher cell yields for less effort,
less time and less money?

You should know more about microcarrier culture with

Cytodex™ 1

- High cell yields
- Much smaller working volumes
- Easy control and monitoring of cultures
- Simple harvesting of cells without centrifugation
- Saves you space, effort, time and money

One gram of Cytodex 1 gives you the same capacity
for cell growth as 7 roller bottles or 76 standard Petri dishes.

Cytodex™ 1 - the new dimension in cell culture.

Ask for more information today, and prove it for yourself.

The stain in the main goes neatly on the plane...

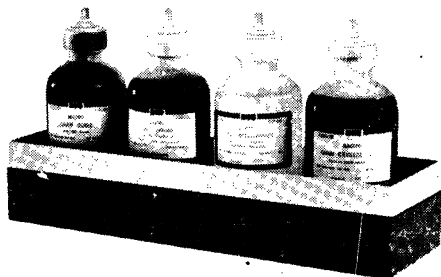

with Bacto - Gram Stain Set.

Stains come in 250 ml. plastic bottles, ready to use. The special snorkel-top plastic cap supplied with each bottle puts the stain right where you want it, on the slide, not on hands or lab coat. The base of the set serves as a rack for the stain bottles. When a bottle is empty, simply discard and replace it from the handy economical 250 ml. 6-pack. The replacement eliminates accidental spillage while pouring from one bottle to another.

No time-consuming and messy dilution or preparation necessary. No weighing, filtering, or costly waste of material. Stains will not precipitate. All reagents are carefully standardized; Difco quality assures consistent, reproducible, accurate results every time. End messy stains in your laboratory. Write for literature 3328. P.O. Box 1058A, Detroit, Michigan 48232.

The set includes solutions for the complete procedure:

Bacto - Gram Crystal Violet
Bacto - Gram Iodine
Bacto - Gram Decolorizer
Bacto - Gram Safranin.
