

JOURNAL OF BACTERIOLOGY

Volume 167

September 1986

No. 3

GENERAL MICROBIOLOGY

- Isolation and Characterization of New Facultatively Alkalophilic Strains of *Bacillus* Species.** Arthur A. Guffanti, Ophir Finkelthal, David B. Hicks, Leon Falk, Anita Sidhu, Anthony Garro, and Terry A. Krulwich 766-773

STRUCTURE AND FUNCTION

- Transglycosylase and Endopeptidase Participate in the Degradation of Murein during Autolysis of *Escherichia coli*.** Kazuaki Kitano, Elaine Tuomanen, and Alexander Tomasz 759-765
- Ultrastructure of the Cell Surface Cellulosome of *Clostridium thermocellum* and Its Interaction with Cellulose.** Edward A. Bayer and Raphael Lamed 828-836
- Serospecific Antigens of *Legionella pneumophila*.** Sharee Otten, Shankar Iyer, William Johnson, and Rex Montgomery 893-904
- Electron Probe Analysis, X-Ray Mapping, and Electron Energy-Loss Spectroscopy of Calcium, Magnesium, and Monovalent Ions in Log-Phase and in Dividing *Escherichia coli* B Cells.** Chung-Fu Chang, Henry Shuman, and Andrew P. Somlyo 935-939
- Autoradiographic Studies of the Synthesis of RNA and Protein as a Function of Cell Volume in *Streptococcus faecium*.** Michael L. Higgins, Arthur L. Koch, David T. Dicker, and Lolita Daneo-Moore 960-967
- Helical Structure of *Bordetella pertussis* Fimbriae.** Alasdair C. Steven, Margaret E. Bisher, Benes L. Trus, Daniel Thomas, Jia Ming Zhang, and James L. Cowell 968-974
- Lipid Interconversions in Aging *Mycoplasma capricolum* Cultures.** Zvi Gross and Shlomo Rottem 986-991
- Determination of Hydrophobicity on Bacterial Surfaces by Nonionic Surfactants.** Yasuko Noda and Yasuhiro Kanemasa 1016-1019
- Three-Dimensional Structure of the Surface Layer Protein of *Aquaspirillum serpens* VHA Determined by Electron Crystallography.** M. R. Dickson, K. H. Downing, W. H. Wu, and R. M. Glaeser 1025-1034

PLANT MICROBIOLOGY

- Organization and Characterization of Genes Essential for Symbiotic Nitrogen Fixation from *Bradyrhizobium japonicum* I110.** John D. Noti, Otto Folkerts, Arthur N. Turken, and Aladar A. Szalay 774-783
- Nitrogenase Promoter-*lacZ* Fusion Studies of Essential Nitrogen Fixation Genes in *Bradyrhizobium japonicum* I110.** Allen C. Yun, John D. Noti, and Aladar A. Szalay 784-791
- Two Gene Clusters of *Rhizobium meliloti* Code for Early Essential Nodulation Functions and a Third Influences Nodulation Efficiency.** Peter Putnoky and Adam Kondorosi 881-887
- Formation in *Rhizobium* and *Agrobacterium* spp. of a 235-Kilodalton Protein Intermediate in β -D(1-2) Glucan Synthesis.** Angeles Zorreguieta and Rodolfo A. Ugalde 947-951

Continued on following page

- Fractionation of *Rhizobium leguminosarum* Cells into Outer Membrane, Cytoplasmic Membrane, Periplasmic, and Cytoplasmic Components.** Ruud A. de Maagd and Ben Lugtenberg 1083–1085

GENETICS AND MOLECULAR BIOLOGY

- Regulatory Elements Common to the *Bacillus pumilus* and *Bacillus subtilis* *trp* Operons.** Mitzi I. Kuroda, Hidenori Shimotsu, Dennis J. Henner, and Charles Yanofsky 792–798
- Cloning of Chromosomal DNA Encoding the F41 Adhesin of Enterotoxigenic *Escherichia coli* and Genetic Homology between Adhesins F41 and K88.** Steve L. Moseley, Gordon Dougan, Robert A. Schneider, and Harley W. Moon 799–804
- Analysis of the Regulatory Sequences Needed for Induction of the Chloramphenicol Acetyltransferase Gene *cat-86* by Chloramphenicol and Amicetin.** Nicholas P. Ambulos, Jr., Elizabeth J. Duvall, and Paul S. Lovett 842–849
- Molecular and Genetic Characterization of Lactose-Metabolic Genes of *Streptococcus cremoris*.** Julia M. Inamine, Linda N. Lee, and Donald J. LeBlanc ... 855–862
- Gene for an Immunoglobulin-Binding Protein from a Group G Streptococcus.** Stephen R. Fahnestock, Patrick Alexander, James Nagle, and David Filpula 870–880
- Identification of the BtuCED Polypeptides and Evidence for Their Role in Vitamin B₁₂ Transport in *Escherichia coli*.** Linda C. DeVeaux, Dina S. Clevenson, Clive Bradbeer, and Robert J. Kadner 920–927
- Nucleotide Sequence of the *btuCED* Genes Involved in Vitamin B₁₂ Transport in *Escherichia coli* and Homology with Components of Periplasmic-Binding-Protein-Dependent Transport Systems.** M. J. Friedrich, Linda C. DeVeaux, and Robert J. Kadner 928–934
- Estimation of Gene Expression in Heterocysts of *Anabaena variabilis* by Using DNA-RNA Hybridization.** Melanie E. Lynn, John A. Bantle, and James D. Ownby 940–946
- Molecular Cloning of the Gene of a Penicillin-Binding Protein Supposed to Cause High Resistance to β -Lactam Antibiotics in *Staphylococcus aureus*.** Michio Matsuhashi, Min Dong Song, Fumitoshi Ishino, Masaaki Wachi, Masaki Doi, Matsuhisa Inoue, Kimiko Ubukata, Naoko Yamashita, and Masatoshi Konno 975–980
- Characterization of *Escherichia coli* Chemotaxis Receptor Mutants with Null Phenotypes.** Norihiro Mutoh, Kenji Oosawa, and Melvin I. Simon 992–998
- A 26-Base-Pair Repetitive Sequence Specific for *Neisseria gonorrhoeae* and *Neisseria meningitidis* Genomic DNA.** Frederick F. Correia, Sumiko Inouye, and Masayori Inouye 1009–1015
- Molecular Cloning, Expression, and Characterization of the Gene for the Surface (HPI)-Layer Protein of *Deinococcus radiodurans* in *Escherichia coli*.** Jürgen Peters and Wolfgang Baumeister 1048–1054
- Growth Phase and OmpR Regulation of Transcription of Microcin B17 Genes.** Concepción Hernández-Chico, Jose Luis San Millán, Roberto Kolter, and Felipe Moreno 1058–1065
- Heterospecific Transformation among Cyanobacteria.** S. E. Stevens, Jr., and R. D. Porter 1074–1076
- Genetics of NAD Metabolism in *Salmonella typhimurium* and Cloning of the *nadA* and *pnuC* Loci.** Simin Targari, Michael P. Spector, and John W. Foster 1086–1088

- Transcription of Ribosomal Genes during a Nutritional Shift-Up of *Escherichia coli*.** Janice M. Zengel and Lasse Lindahl 1095–1097

PLASMIDS AND TRANSPOSONS

- Nucleotide Sequence of the Constitutive Macrolide-Lincosamide-Streptogramin B Resistance Plasmid pNE131 from *Staphylococcus epidermidis* and Homologies with *Staphylococcus aureus* Plasmids pE194 and pSN2.** Bert C. Lampson and Joseph T. Parisi 888–892

EUCARYOTIC CELLS

- Characteristics of Sterol Uptake in *Saccharomyces cerevisiae*.** R. Todd Lorenz, Russell J. Rodriguez, Thomas A. Lewis, and Leo W. Parks 981–985
- Molecular Recognition of Siderophores in Fungi: Role of Iron-Surrounding *N*-Acyl Residues and the Peptide Backbone during Membrane Transport in *Neurospora crassa*.** Hans-Georg Huschka, Mahbulul A. F. Jalal, Dick van der Helm, and Günther Winkelmann 1020–1024
- Genetic and Biochemical Identification of the Glutamate Synthase Structural Gene in *Neurospora crassa*.** David Romero and Guillermo Dávila 1043–1047

MEMBRANES

- Further Evidence for Overlapping Transcriptional Units in an *Escherichia coli* Cell Envelope-Cell Division Gene Cluster: DNA Sequence and Transcriptional Organization of the *ddl ftsQ* Region.** Arthur C. Robinson, Daniel J. Kenan, Janis Sweeney, and William D. Donachie 809–817
- Immediate Entrance to the Export Pathway after Synthesis as a Requirement for Export of the *sak* Gene Product in *Escherichia coli*.** Tomoyuki Sako 850–854
- Interaction between Membrane Proteins PBP3 and RodA Is Required for Normal Cell Shape and Division in *Escherichia coli*.** Kenneth J. Begg, Brian G. Spratt, and William D. Donachie 1004–1008
- Exclusion of High-Molecular-Weight Maltosaccharides by Lipopolysaccharide O-Antigen of *Escherichia coli* and *Salmonella typhimurium*.** Thomas Ferenci and Kin-Sang Lee 1081–1082
- Changes in Membrane Lipid Composition of *Mycoplasma capricolum* Affect the Cell Volume.** Nino Romano, Mitchell H. Shirvan, and Shlomo Rottem ... 1089–1091

PHYSIOLOGY AND METABOLISM

- Acquisition of Glucose by *Rickettsia prowazekii* through the Nucleotide Intermediate Uridine 5'-Diphosphoglucose.** Herbert H. Winkler and Robin M. Daugherty 805–808
- Initial Reactions of Xanthone Biodegradation by an *Arthrobacter* sp.** Paul H. Tomasek and Ronald L. Crawford 818–827
- nifV*-Dependent, Low-Molecular-Weight Factor Required for In Vitro Synthesis of Iron-Molybdenum Cofactor of Nitrogenase.** Timothy R. Hoover, Vinod K. Shah, Gary P. Roberts, and Paul W. Ludden 999–1003
- ATP Hydrolysis during SOS Induction in *Escherichia coli*.** Jordi Barbé, Antonio Villaverde, Jordi Cairo, and Ricardo Guerrero 1055–1057
- ATP Transport System in the Intracellular Bacterium *Bdellovibrio bacteriovorus* 109J.** E. G. Ruby and J. B. McCabe 1066–1070
- Induction of Autolysis in Nongrowing *Escherichia coli*.** Elaine Tuomanen and Alexander Tomasz 1077–1080

Galactose Metabolism in <i>Rhizobium meliloti</i> L5-30. Alicia Arias and Carlos Cerveñansky	1092-1094
---	-----------

ENZYMOLGY

Characterization and Purification of the Membrane-Bound ATPase of the Archaeobacterium <i>Methanosarcina barkeri</i>. Ken-ichi Inatomi	837-841
Glucose-Fructose Oxidoreductase, a New Enzyme Isolated from <i>Zymomonas mobilis</i> That Is Responsible for Sorbitol Production. Michael Zachariou and Robert K. Scopes	863-869

BACTERIOPHAGE

Mutants of <i>Escherichia coli</i> Defective for Replicative Transposition of Bacteriophage Mu. Wilma Ross, Scott H. Shore, and Martha M. Howe	905-919
Control of Lysogeny and Immunity of <i>Bacillus subtilis</i> Temperate Bacteriophage SPβ by Its <i>d</i> Gene. Jane R. McLaughlin, Hing C. Wong, Yi E. Ting, Janelle N. Van Arsdell, and Shing Chang	952-959
Mutational Analysis of Bacteriophage Lambda Lysis Gene S. Ronald Raab, Gregory Neal, Janetta Garrett, Ray Grimaila, Robert Fusselman, and Ry Young	1035-1042
Cloning and Expression of the <i>lf</i> Gene of Bacteriophage T5. Knut J. Heller and Verena Krauel	1071-1073

ERRATUM

Identification of the Pleiotropic <i>sacQ</i> Gene of <i>Bacillus subtilis</i>. M. Yang, E. Ferrari, E. Chen, and D. J. Henner	1098
---	------

AUTHOR'S CORRECTION

Kinetics of Gram-Negative Bacterial Cell Elongation as Measured by Using the Large Rod "<i>Lineola longa</i>." W. W. Baldwin and W. S. Wegener	1099
---	------

Date of Issue: 2 September 1986

**CHANGE IN METHOD OF DELIVERY FOR SUBSCRIPTIONS
OUTSIDE THE UNITED STATES**

For the past several years, ASM journal subscriptions have been fulfilled via air drop shipment to central distribution points, from which the issues were then mailed. Unfortunately, we can no longer afford this service. To hold down drastically rising costs, we have arranged to distribute our journals through surface drop shipment followed by mailing. Subscribers outside the United States will receive their issues two to three weeks later than heretofore, for which we are deeply regretful. There was no way that we could continue the previous service at its very expensive and continually increasing cost.

This change in mode of delivery will be effective beginning with the November issues. Subscribers within the United States and subscribers from abroad who are paying the surcharge for direct air mail shipment will be unaffected by the change.
