Are There Acyl-Homoserine Lactones within Mammalian Intestines?

Matthew C. Swearingen, Anice Sabag-Daigle, Brian M. M. Ahmer 173–179

ARTICLES

2-Nitrobenzoate 2-Nitroreductase (NbaA) Switches Its Substrate Specificity from 2-Nitrobenzoic Acid to 2,4-Dinitrobenzoic Acid under Oxidizing Conditions

Yong-Hak Kim, Woo-Seok Song, Hayoung Go, Chang-Jun Cha, Cheolju Lee, Myeong-Hee Yu, Peter C. K. Lau, Kangseok Lee 180–192

The *Bacillus subtilis* Response Regulator Gene *degU* Is Positively Regulated by CcpA and by Catabolite-Repressed Synthesis of ClpC

Hiroshi Ishii, Teruo Tanaka, Mitsuo Ogura 193–201

The tRNA^{arg} Gene and *engA* Are Essential Genes on the 1.7-Mb pSymb Megaplasmid of *Sinorhizobium meliloti* and Were Translocated Together from the Chromosome in an Ancestral Strain

George diCenzo, Branislava Milunovic, JiuJun Cheng, Turlough M. Finan 202–212

Role of *Pseudomonas aeruginosa* Peptidoglycan-Associated Outer Membrane Proteins in Vesicle Formation

Aimee K. Wessel, Jean Liew, Taejoon Kwon, Edward M. Marcotte, Marvin Whiteley 213–219

Roles of AtpI and Two YidC-Type Proteins from Alkaliphilic *Bacillus pseudofirmus* OF4 in ATP Synthase Assembly and Nonfermentative Growth

Jun Liu, David B. Hicks, Terry A. Krulwich 220–230

Role of Homologous Recombination in Adaptive Diversification of Extraintestinal *Escherichia coli*

Sandip Paul, Elena V. Linardopoulou, Mariya Billig, Veronika Tchesnokova, Lance B. Price, James R. Johnson, Sujay Chattopadhyay, Evgeni V. Sokurenko 231–242

PhoY2 of Mycobacteria Is Required for Metabolic Homeostasis and Stress Response

Chuan Wang, Yi Mao, Jia Yu, Lin Zhu, Ming Li, Decheng Wang, Dandan Dong, Jun Liu, Qian Gao 243–252

Gene Conservation among Endospore-Forming Bacteria Reveals Additional Sporulation Genes in *Bacillus subtilis*

Bjorn A. Traag, Antonia Pugliese, Jonathan A. Eisen, Richard Losick 253–260

Missense Mutations in Cytochrome *c* Maturation Genes Provide New Insights into *Rhodobacter capsulatus* *cbb*₃-Type Cytochrome *c* Oxidase Biogenesis

Seda Ekici, Xinpei Jiang, Hans-Georg Koch, Fevzi Daldal 261–269

Gliding Motility and Por Secretion System Genes Are Widespread among Members of the Phylum *Bacteroidetes*

Mark J. McBride, Yongtao Zhu 270–278

The Nitrogenase Regulatory Enzyme Dinitrogenase Reductase ADP-Ribosyltransferase (DraT) Is Activated by Direct Interaction with the Signal Transduction Protein GlnB

Vivian R. Moure, Karamatullah Danyal, Zhi-Yong Yang, Shannon Wendroth, Marcelo Müller-Santos, Fabio O. Pedrosa, Marcelo Scarduelli, Edileusa C. M. Gerhardt, Luciano F. Huergo, Emanuel M. Souza, Lance C. Seefeldt 279–286

Pseudomonas syringae pv. tomato DC3000 CmaL (PSPTO4723), a DUF1330 Family Member, Is Needed To Produce L-*allo*-Isoleucine, a Precursor for the Phytotoxin Coronatine

Jay N. Worley, Alistair B. Russell, Aaron G. Wexler, Philip A. Bronstein, Brian H. Kvitko, Stuart B. Krasnoff, Kathy R. Munkvold, Bryan Swingle, Donna M. Gibson, Alan Collmer 287–296

FliW and FliS Function Independently To Control Cytoplasmic Flagellin Levels in *Bacillus subtilis*

Sampriti Mukherjee, Paul Babitzke, Daniel B. Kearns 297–306

Continued on following page

Characterization of BreR Interaction with the Bile Response Promoters <i>breAB</i> and <i>breR</i> in <i>Vibrio cholerae</i>	Francisca A. Cerda-Maira, Gabriela Kovacikova, Brooke A. Jude, Karen Skorupski, Ronald K. Taylor	307–317
Structural Comparison of ColH and ColG Collagen-Binding Domains from <i>Clostridium histolyticum</i>	Ryan Bauer, Jeffrey J. Wilson, Sagaya Theresa Leena Philominathan, Dan Davis, Osamu Matsushita, Joshua Sakon	318–327
Genetic Characterization of a Novel Rhizobial Plasmid Conjugation System in <i>Rhizobium leguminosarum</i> bv. <i>viciae</i> Strain VF39SM	Hao Ding, Cynthia B. Yip, Michael F. Hynes	328–339
Cloning, Expression, and Functional Characterization of Secondary Amino Acid Transporters of <i>Lactococcus lactis</i>	Hein Trip, Niels L. Mulder, Juke S. Lolkema	340–350
The <i>Francisella tularensis</i> FabI Enoyl-Acyl Carrier Protein Reductase Gene Is Essential to Bacterial Viability and Is Expressed during Infection	Luke C. Kingry, Jason E. Cummings, Kerry W. Brookman, Gopal R. Bommineni, Peter J. Tonge, Richard A. Slayden	351–358
Detoxification of 7-Dehydrocholesterol Fatal to <i>Helicobacter pylori</i> Is a Novel Role of Cholesterol Glucosylation	Hirofumi Shimomura, Kouichi Hosoda, David J. McGee, Shunji Hayashi, Kenji Yokota, Yoshikazu Hirai	359–367
Flagellum Density Regulates <i>Proteus mirabilis</i> Swarmer Cell Motility in Viscous Environments	Hannah H. Tuson, Matthew F. Copeland, Sonia Carey, Ryan Sacotte, Douglas B. Weibel	368–377
High-Mobility-Group A-Like CarD Binds to a DNA Site Optimized for Affinity and Position and to RNA Polymerase To Regulate a Light-Inducible Promoter in <i>Myxococcus xanthus</i>	Francisco García-Heras, Javier Abellón-Ruiz, Francisco J. Murillo, S. Padmanabhan, Montserrat Elías-Arnanz	378–388
Partial Complementation of <i>Sinorhizobium meliloti bacA</i> Mutant Phenotypes by the <i>Mycobacterium tuberculosis</i> BacA Protein	M. F. F. Arnold, A. F. Haag, S. Capewell, H. I. Boshoff, E. K. James, R. McDonald, I. Mair, A. M. Mitchell, B. Kerscher, T. J. Mitchell, P. Mergaert, C. E. Barry III, M. Scocchi, M. Zanda, D. J. Campopiano, G. P. Ferguson	389–398
<i>Chlorobaculum tepidum</i> TLS Displays a Complex Transcriptional Response to Sulfide Addition	Brian J. Eddie, Thomas E. Hanson	399–408
