COMMENTARY

Regulation by the Modulation of Gene Expression Variability	David Dubnau	1974–1975
---	--------------	-----------

ARTICLES

Oxygen-Dependent Cell-to-Cell Variability in the Output of the <i>Escherichia coli</i> Tor Phosphorelay	Manuela Roggiani, Mark Goulian	1976–1987
CysB Negatively Affects the Transcription of <i>pqsR</i> and <i>Pseudomonas</i> Quinolone Signal Production in <i>Pseudomonas aeruginosa</i>	John M. Farrow III, L. Lynn Hudson, Greg Wells, James P. Coleman, Everett C. Pesci	1988–2002
Secretion of Flagellar Proteins by the <i>Pseudomonas aeruginosa</i> Type III Secretion-Injectisome System	Dilek Ince, Fayyaz S. Sutterwala, Timothy L. Yahr	2003–2011
Biosynthesis of the Common Polysaccharide Antigen of <i>Pseudomonas aeruginosa</i> PAO1: Characterization and Role of GDP-D-Rhamnose:GlcNAc/GalNAc-Diphosphate-Lipid α 1,3-D-Rhamnosyltransferase WbpZ	Shuo Wang, Youai Hao, Joseph S. Lam, Jason Z. Vlahakis, Walter A. Szarek, Anna Vinnikova, Vladimir V. Veselovsky, Inka Brockhausen	2012–2019
Methenyl-Dephosphotetrahydromethanopterin Is a Regulatory Signal for Acclimation to Changes in Substrate Availability in <i>Methylobacterium extorquens</i> AM1	N. Cecilia Martinez-Gomez, Nathan M. Good, Mary E. Lidstrom	2020–2026
Resources for Genetic and Genomic Analysis of Emerging Pathogen <i>Acinetobacter baumannii</i>	Larry A. Gallagher, Elizabeth Ramage, Eli J. Weiss, Matthew Radey, Hillary S. Hayden, Kiara G. Held, Holly K. Huse, Daniel V. Zurawski, Mitchell J. Brittnacher, Colin Manoil	2027–2035
Distinct Paths for Basic Amino Acid Export in <i>Escherichia coli</i> : YbjE (LysO) Mediates Export of L-Lysine	Amit Pathania, Abhijit A. Sardesai	2036–2047
Biochemical and Functional Characterization of the NurA-HerA Complex from <i>Deinococcus radiodurans</i>	Kaiying Cheng, Xuanyi Chen, Guangzhi Xu, Liangyan Wang, Hong Xu, Su Yang, Ye Zhao, Yuejin Hua	2048–2061
Involvement of the TetR-Type Regulator PaaR in the Regulation of Pristinamycin I Biosynthesis through an Effect on Precursor Supply in <i>Streptomyces pristinaespiralis</i>	Yawei Zhao, Rongrong Feng, Guosong Zheng, Jinzhong Tian, Lijun Ruan, Mei Ge, Weihong Jiang, Yinhua Lu	2062–2071
Quorum Sensing Is Accompanied by Global Metabolic Changes in the Opportunistic Human Pathogen <i>Pseudomonas aeruginosa</i>	Peter W. Davenport, Julian L. Griffin, Martin Welch	2072–2082

Cover photograph (Copyright © 2015, American Society for Microbiology. All Rights Reserved.): False-colored scanning electron microscopy image of *Enterococcus faecalis* MMH594 cells (purple) surrounded by an exopolysaccharide matrix (green). The matrix is produced after 6 days of growth under nitrogen-rich conditions. (Photo courtesy of Diana K. Morales, Harvard Medical School, Boston, MA.)
