SOCIETY FOR
MICROBIOLOGY

Journal of
Bacteriology®

CONTENTS • AUGUST 2018 • VOLUME 200, NO. 15

COVER IMAGE

Cover photograph: Vibrios, from the environment to our table. Shown are the diverse hosts colonized by *Vibrio* species in the environment and the path followed by pathogenic vibrios en route to the human alimentary tract. Host-*Vibrio* interactions represent only a fraction of the topics covered at the Vibrio2017 meeting held in Chicago, IL. (Courtesy of Yen Shu Liao, New York, NY; reprinted with permission.) (See related article at e00752-17.)

EDITORIAL

ASM Vibrio2017 Conference Special Issue e00322-18
Victor J. DiRita

SPOTLIGHT

Articles of Significant Interest in This Issue e00325-18

MEETING REVIEWS

***Photobacterium damsela* subsp. *damsela*, a Generalist Pathogen with Unique Virulence Factors and High Genetic Diversity** e00002-18

Carlos R. Osorio, Ana Vences, Xosé M. Matanza, Mateus S. Terceti

σ -Finig DarR, a LysR-Type Transcriptional Regulator That Responds to σ -Aspartate e00121-18
Mark J. Mandel

Vibrio2017: the Seventh International Conference on the Biology of Vibrios e00304-18
Karl E. Klose, Karla J. F. Satchell

Chemotaxis Arrays in *Vibrio* Species and Their Intracellular Positioning by the ParC/ParP System e00793-17

Simon Ringgaard, Wen Yang, Alejandra Alvarado, Kathrin Schirner, Ariane Briegel

Environmental Role of Pathogenic Traits in *Vibrio cholerae* e00795-17
S. Nazmus Sakib, Geethika Reddi, Salvador Almagro-Moreno

MEETING PRESENTATIONS

Tracing Genomic Divergence of *Vibrio* Bacteria in the Harveyi Clade e00001-18
Huei-Mien Ke, Dang Liu, Yoshitoshi Ogura, Tetsuya Hayashi, Henryk Urbanczyk, Isheng J. Tsai

Cyclic di-GMP Positively Regulates DNA Repair in *Vibrio cholerae* e00005-18
Nicolas L. Fernandez, Disha Srivastava, Amanda L. Ngouajio, Christopher M. Waters

Discovery of Calcium as a Biofilm-Promoting Signal for *Vibrio fischeri* Reveals New Phenotypes and Underlying Regulatory Complexity e00016-18
Alice H. Tischler, Louise Lie, Cecilia M. Thompson, Karen L. Visick

Evolution of a Vegetarian *Vibrio*: Metabolic Specialization of *Vibrio breoganii* to Macroalgal Substrates e00020-18

Christopher H. Corzett, Joseph Elsherbini, Diana M. Chien, Jan-Hendrik Hehemann, Andreas Henschel, Sarah P. Preheim, Xiaoqian Yu, Eric J. Alm, Martin F. Polz

- NtrC Adds a New Node to the Complex Regulatory Network of Biofilm Formation and *vps* Expression in *Vibrio cholerae*** e00025-18
Andrew T. Cheng, David Zamorano-Sánchez, Jennifer K. Teschler, Daniel Wu, Fitnat H. Yildiz
- A Critical Region in the FlaA Flagellin Facilitates Filament Formation of the *Vibrio cholerae* Flagellum** e00029-18
Mylea A. Echazarreta, Johnathan L. Kepple, Li-Hua Yen, Yue Chen, Karl E. Klose
- Natural Transformation in *Vibrio parahaemolyticus*: a Rapid Method To Create Genetic Deletions** e00032-18
Suneeta Chimalapati, Marcela de Souza Santos, Kelly Servage, Nicole J. De Nisco, Ankur B. Dalia, Kim Orth
- The Transcriptional Regulator HlyU Positively Regulates Expression of *exsA*, Leading to Type III Secretion System 1 Activation in *Vibrio parahaemolyticus*** e00653-17
Landon J. Getz, Nikhil A. Thomas
- Outer Membrane Vesicles Facilitate Trafficking of the Hydrophobic Signaling Molecule CAI-1 between *Vibrio harveyi* Cells** e00740-17
Sophie Brameyer, Laure Plener, Axel Müller, Andreas Klingl, Gerhard Wanner, Kirsten Jung
- A Self-Assembling Whole-Cell Vaccine Antigen Presentation Platform** e00752-17
Julie Liao, Daniel R. Smith, Jóhanna Brynjarsdóttir, Paula I. Watnick
- Metabolic Reprogramming of *Vibrio cholerae* Impaired in Respiratory NADH Oxidation Is Accompanied by Increased Copper Sensitivity** e00761-17
Charlotte Toulouse, Kristina Metesch, Jens Pfannstiel, Julia Steuber
- Vibrio fischeri* DarR Directs Responses to D-Aspartate and Represents a Group of Similar LysR-Type Transcriptional Regulators** e00773-17
Richard M. Jones, Jr., David L. Popham, Alicia L. Schmidt, Ellen L. Neidle, Eric V. Stabb
- Diversity and Dynamics of the Canadian Coastal *Vibrio* Community: an Emerging Trend Detected in the Temperate Regions** e00787-17
Swapan K. Banerjee, Rebecca Rutley, Jeff Bussey
- Influence of Chemotaxis and Swimming Patterns on the Virulence of the Coral Pathogen *Vibrio coralliilyticus*** e00791-17
Blake Ushijima, Claudia C. Häse
- Vibrio cholerae* Outer Membrane Vesicles Inhibit Bacteriophage Infection** e00792-17
Tamara Reyes-Robles, Rebecca S. Dillard, Lynne S. Cairns, Cecilia A. Silva-Valenzuela, Max Housman, Afsar Ali, Elizabeth R. Wright, Andrew Camilli
- Alternative Oxidase Activity Reduces Stress in *Vibrio fischeri* Cells Exposed to Nitric Oxide** e00797-17
Anne K. Dunn
