SPOTLIGHT

Article of Significant Interest Selected from This Issue by the Editors e00778-17

COMMENTARY

Multiple Structures Disclose the Secretins' Secrets e00702-17

Alain Filloux, Romé Voulhoux

RESEARCH ARTICLES

CodY-Mediated c-di-GMP-Dependent Inhibition of Mammalian Cell Invasion in e00457-17

Listeria monocytogenes

Ahmed M. Elbakush, Kurt W. Miller, Mark Gomelsky

Structure and Membrane Topography of the Vibrio-Type Secretin Complex from e00521-17

the Type 2 Secretion System of Enteropathogenic Escherichia coli

Iain D. Hay, Matthew J. Belousoff, Rhys A. Dunstan, Rebecca S. Bamert, Trevor Lithgow

Ca²⁺-Induced Two-Component System CvsSR Regulates the Type III Secretion e00538-17

System and the Extracytoplasmic Function Sigma Factor AlgU in Pseudomonas syringae pv. tomato DC3000

Maxwell R. Fishman, Johnson Zhang, Philip A. Bronstein, Paul Stodghill,

Melanie J. Filiatrault

Galactosylation of the Secondary Cell Wall Polysaccharide of Bacillus anthracis e00562-17

and Its Contribution to Anthrax Pathogenesis

Alice Chateau, Justin Mark Lunderberg, So Young Oh, Teresa Abshire, Arthur

Friedlander, Conrad P. Quinn, Dominique M. Missiakas, Olaf Schneewind

Flexible Hinges in Bacterial Chemoreceptors e00593-17

Narahari Akkaladevi, Filiz Bunyak, David Stalla, Tommi A. White, Gerald L. Hazelbauer

Roles of Staphylococcus aureus Mnh1 and Mnh2 Antiporters in Salt Tolerance, e00611-17

Alkali Tolerance, and Pathogenesis

Manisha Vaish, Alexa Price-Whelan, Tamara Reyes-Robles, Jun Liu, Amyeo Jereen,

Stephanie Christie, Francis Alonzo III, Meredith A. Benson, Victor J. Torres,

Terry A. Krulwich

The Nitrogen Regulatory PII Protein (GlnB) and N-Acetylglucosamine 6-Phosphate e00691-17

Epimerase (NanE) Allosterically Activate Glucosamine 6-Phosphate Deaminase (NagB) in Escherichia coli

Irina A. Rodionova, Norman Goodacre, Mohan Babu, Andrew Emili, Peter Uetz,

Milton H. Saier, Jr.

ERRATUM

Erratum for Hou et al., "The Novel Transcriptional Regulator LmbU Promotes Lincomycin Biosynthesis through Regulating Expression of Its Target Genes in *Streptomyces lincolnensis*"

e00777-17

Bingbing Hou, Yanwei Lin, Haizhen Wu, Meijin Guo, Hrvoje Petkovic, Liyuan Tao, Xiaoyu Zhu, Jiang Ye, Huizhan Zhang
