SPOTLIGHT

Article of Significant Interest from This Issue e00225-19

COMMENTARY

The Importance of Being an Antagonist as Well as Persistent e00146-19
Ann Progulsk-Fox

MINIREVIEW

The Yin and Yang of *Streptococcus* Lung Infections in Cystic Fibrosis: a Model for Studying Polymicrobial Interactions e00115-19
Jessie E. Scott, George A. O'Toole

RESEARCH ARTICLES

σ^B Inhibits Poly-*N*-Acetylglucosamine Exopolysaccharide Synthesis and Biofilm Formation in *Staphylococcus aureus* e00098-19
Jaione Valle, Maite Echeverz, Iñigo Lasa

Activity of Spore-Specific Respiratory Nitrate Reductase 1 of *Streptomyces coelicolor* A3(2) Requires a Functional Cytochrome *bcc-aa*₃ Oxidase Supercomplex e00104-19
Dörte Falke, Bianca Biefel, Alexander Haase, Stefan Franke, Marco Fischer, R. Gary Sawers

Identification of a Formate-Dependent Uric Acid Degradation Pathway in *Escherichia coli* e00573-18
Yumi Iwadate, Jun-ichi Kato

Identification of PGN_1123 as the Gene Encoding Lipid A Deacylase, an Enzyme Required for Toll-Like Receptor 4 Evasion, in *Porphyromonas gingivalis* e00683-18
Sumita Jain, Ana M. Chang, Manjot Singh, Jeffrey S. McLean, Stephen R. Coats, Roger W. Kramer, Richard P. Darveau

Antibiotic Korormicin A Kills Bacteria by Producing Reactive Oxygen Species e00718-18
Adam Maynard, Nicole L. Butler, Takeshi Ito, Adilson José da Silva, Masatoshi Murai, Tsute Chen, Mattheos A. G. Koffas, Hideto Miyoshi, Blanca Barquera

Extragenic Suppression of Elongation Factor P Gene Mutant Phenotypes in *Erwinia amylovora* e00722-18
Sara M. Klee, Judith P. Sinn, Aleah C. Holmes, Brian L. Lehman, Teresa Krawczyk, Kari A. Peter, Timothy W. McNellis

- Cell Shape and Population Migration Are Distinct Steps of *Proteus mirabilis* Swarming That Are Decoupled on High-Percentage Agar** e00726-18
Kristin Little, Jacob Austerman, Jenny Zheng, Karine A. Gibbs
- The RNase YbeY Is Vital for Ribosome Maturation, Stress Resistance, and Virulence of the Natural Genetic Engineer *Agrobacterium tumefaciens*** e00730-18
Philip Möller, Philip Busch, Beate Sauerbrei, Alexander Kraus, Konrad U. Förstner, Tuan-Nan Wen, Aaron Overlöper, Erh-Min Lai, Franz Narberhaus
- Suppressor Mutations in *degS* Overcome the Acute Temperature-Sensitive Phenotype of $\Delta degP$ and $\Delta degP \Delta tol-pal$ Mutants of *Escherichia coli*** e00742-18
Brea Kern, Owen P. Leiser, Rajeev Misra
- Fine-Tuning of σ^E Activation Suppresses Multiple Assembly-Defective Mutations in *Escherichia coli*** e00745-18
Elizabeth M. Hart, Aileen O'Connell, Kimberly Tang, Joseph S. Wzorek, Marcin Grabowicz, Daniel Kahne, Thomas J. Silhavy
- Blue Light Is a Universal Signal for *Escherichia coli* Chemoreceptors** e00762-18
Tatyana Perlova, Martin Gruebele, Yann R. Chemla
